

# Singtel FUTURE MAKERS

In partnership with  
National Council of Social Service  
TechUP Series

## Unleashing an inclusive digital future with 5G

Join us at our virtual sharing session to learn  
how 5G can create a positive impact to the social sector

**Date : 24 June 2022**  
**Time : 2 - 4pm (SGT)**

**REGISTER HERE**

At Singtel, our purpose is to empower people and businesses and create a more sustainable digital future. Through Singtel Future Makers, our social innovation programme incepted in 2016, we have invested S\$5 million and supported 72 local and regional social impact start-ups.

As digital connectivity is integrated in our everyday life, we believe that Singtel's emerging technological and connectivity solutions like 5G can enable a paradigm shift to catalyse more innovative digital solutions that amplify social impact.

Developed in conjunction with NCSS's TechUP Series, this webinar will be sharing more about 5G's use cases & capabilities, and how it can transform industries and accelerate digitalisation in multiple sectors including the social sector. Learn also about how start-ups and community partners can work with Singtel to utilise 5G for positive social impact through our upcoming Singtel Future Makers 2022.
